

Health Education Professional Learning Series

California Health Education Framework Rollout Project

The project aims to shift educators to more advanced student-centered, skill-based teaching and learning practices, as well as health content, while building a statewide system of support for health education.

A series of professional learning opportunities will be provided in 2020 and 2020-2021. The first session will focus on the overarching framework guidance and implementation resources to support educators.

JOIN US TO:

- Develop a deeper understanding of the CA Health Education Framework guidance
- Connect with other educators to build your health education tool box
