Social & Emotional Learning

The ability to successfully communicate, resolve conflict, interact with others, and manage emotional responses can help students do better in the classroom and in life. Social-emotional learning empowers students with abilities that directly impact not only their academic lives, but their success and happiness as adults. Come listen as a panel of specialists discusses how our community can grow healthy minds. Find out what we can do in the classroom to help our students develop a better sense of self, improve their social and emotional skills, and build healthy relationships. Our expert panel includes:

- Claudia Frandsen, Director, Leadership Support, VCOE
- Erik Sternad, Executive Director, Interface, Ventura County
- David Castellano, Director, Student Support Services, Hueneme School District

INVITEES: School Board Members, Superintendents, Assistant Superintendents, Spouses, Guests, & Student Board Members are invited to attend.
